

# BROAD GROUP MISSIONS

January 1<sup>th</sup> , 2025 Chairman's Office

BROAD Group is a privately-owned enterprise founded with 6,000 dollars in 1988. The company has developed hundreds of hi-tech products and has never copied any technology of its peers since its establishment. The mission of BROAD Group is “For Humanity’s Future, Using original decarbon & durable technology for the earth, Using original clean & safe technology for humans.” Headquartered in Changsha, BROAD Group has exported products to over 80 countries. BROAD subsidiaries are listed below:

1. BROAD Air Conditioning Co., Ltd., registered in 1988, manufactures “non-electric air conditioning systems” powered by industrial waste heat, power generation exhaust gas and natural gas as heat sources, Ultra-durable “power-efficient chillers”, water-based thermal energy storage and district energy systems with the mission of “maximum comfort but minimum emissions”
2. BROAD Energy Service Co., Ltd., founded in 2006, provides clients with investment consulting, design, implementation and operational service of district air conditioning systems and industrial energy systems by means of BROAD diversified low carbon technologies and EMC(Energy Management Contract) mode, with the mission of “optimizing resources, being worry-free, money-saving and low carbon”
3. BROAD Clean Air Technology Co., Ltd., established in 2005, produces Fresh Air Machines with 80% heat recovery, filtering PM2.5 by 99.9% and bringing in 100% fresh air. The company also produces electrostatic air purifiers and air monitor with the mission of “clean air shared by all humans”
4. BROAD Renewable Resources Co., Ltd., established in 2008, produces clean lubricants and fuel oils with industrial and transportation waste mineral oils as well as waste biomass oil as raw materials with the mission of “eradicating waste oil pollution for the world”
5. BROAD CORE Slab Co., Ltd., founded in 2016, produces CORE Slabs in stainless-steel, carbon steel and aluminum for BROAD and its partners with the mission of “reshaping the building, transportation and energy industries with ultra-lightweight, ultra-strong sandwiched structure materials”
6. BROAD Holon Co., Ltd., founded in 2009, manufactures prefabricated stainless steel Holon Building with the mission of “High-Tech Home for the benefit of humanity”
7. BROAD Wind Harvest Technology Co., Ltd., established in 2022, produces aluminum wind turbines for onshore ultra-high wind power and offshore hurricane-resistant wind power with the mission of “spreading wind power to every corner of the earth”
8. BROAD Road and Bridge Co., Ltd., founded in 2021, produces hi-tech, low-cost, short-duration elevated highways and bridges with the mission of “preventing highways from severing the nature”
9. BROAD Core Transport Technology Co., Ltd., founded in 2019, researches and develops the lightweight trains, containers, ships and aircraft with the mission of “making transportation vehicles lighter and safer”
10. BROAD Vacuum Loop Co., Ltd., founded in 2018, applies stainless steel CORE slabs to hi-speed vacuum tubes and train bodies with the mission of “fulfilling the dream of the time tunnel for long-range transportation”
